Abstract (en)

[origin: WO2011116791A1] The invention relates to a method (E) for recording health-related information (GI) about internal organs and/or a metabolism of a person to be examined. In this case, input questions using an interface (19) to a recording machine (21) are taken as a basis for recording cartographic features (M, 13a, 13b, 13c, 13d, 13e) in the mouth/jaw/cheek area (3) of the person to be examined, and said features are provided for later conversion into health-related information (G1) about the internal organs and/or the metabolism in the form of machine-readable data (MD). In addition, the invention relates to a recording machine (21) which can be used for this purpose.
