Abstract (en)  
The method involves sealing of films, into packages (15), in a sealing station (3), where sealing seams are generated. The position of the sealing seams is determined. A cutting device (4) is provided that is suitable for positioning the sealing seams. The sealing seams are detected by a seal according to a vision system, and the position of a slice image is determined in a controller (17). A reference element is generated in the sealing station by stamping or sealing characteristic. An independent claim is also included for a thermoforming packaging machine with a contour course of the sealing seams.

Abstract (de)  
Die Erfindung betrifft ein Verfahren zum Schneiden von Packungen (15) in einer Tiefziehverpackungsmaschine (1) aus einem Folienverbund (18) mittels vorheriger Ermittlung der Lage der Siegelnähte (26) und geeigneter Anpassung de Lage eines Schnittbilds (28), sowie eine Tiefziehverpackungsmaschine (1) zum Durchführen des oben genannten Verfahrens.
