Abstract (en)

The method involves providing a pocket that is open on one side, and filling the pocket by a metering device. The pocket is attached to a valve (3a) by welding the pocket on a lower tube (3c) of the valve, where a body (31) of the valve projects from the pocket. The valve is assembled with a cover (4a) for closing a refillable diffuser housing by a lower part of the cover. The valve is secured to a cup (32) with a pressing contour (35), where product characteristics are printed on the pocket and/or a label is bonded on the pocket before filling the pocket. An independent claim is also included for a recharging device for a rechargeable diffuser housing.

Abstract (fr)

L'objet de l'invention est un procédé de réalisation d'un dispositif recharge, pour boîtier diffuseur rechargeable, comprenant une poche (1) contenant le produit à diffuser dans lequel les étapes de réalisation (20) de la poche (1) ouverte sur un côté, remplissage (30) de la poche (1) au moyen d'un dispositif doseur (2) puis fixation (40) de la poche (1) sur une valve (3a, 3b) par soudure (1) de la poche sur un tube inférieur (3c) de la valve (3a, 3b), le corps (31) de la valve (3a, 3b) dépassant de la poche (1).
