Abstract (en)  
[origin: EP2551415A2] The flow component has a surface which is partially formed with one or more layers of floor structures that are set to contact each other. On the surface of the flow component, a partially connecting element (7) for connection with one or more layers of the floor structures is arranged. The flocking synthetic fiber like polyamide fibers or polyester fibers, or natural fibers such as flax or hemp, is provided in the connecting element.
