Abstract (en)
[origin: EP2551431A1] The hinge has two hinge parts (1, 2) comprising respective receiving bodies (3, 4) with respective end hubs (41). Back plates (40) are located at the hubs of one of the receiving bodies and provided with a set of holes (46) for fastening the receiving body at a door leaf or a door frame using screws (47). Front plates (18) are arranged on sides of the hubs lying opposite to the back plates. The front plates and the hubs comprise respective holes (45, 56) congruent to the holes of the back plates. The screws are insertable into the hinge via the holes of the front plates and the hubs. The screws are formed as sleeves.
