Abstract (en)
[origin: EP2551438A2] The plug-in connector (1) has outwardly projecting disks (6) and a base part (2), where the plug-in connector is formed as straight-, angled-, corner- or junction connector. The disks describe an inner envelope and an outer envelope, where the inner envelope is formed based on the base part. One or multiple longitudinal ribs (3,4) are lifted from the base part with the disks. The longitudinal ribs are formed as lateral bars that are directly connected to the disks.
