Abstract (en)
[origin: EP2551529A2] The pressure intensifier (1) has a gas or air pressure driven pneumatic unit (5) connected with a hydraulic unit (4). A coupling unit (3) immovably and releasably connects the hydraulic tool (7) with the hydraulic unit. The pneumatic unit, hydraulic unit and coupling unit are integrated into one-piece mobile handling unit (2). The coupling unit is adjusted between locked position and unlocked position, where the coupling unit is separated from the hydraulic tool in unlocked position and is fixed with the hydraulic tool in locked position.
