Abstract (en)  
[origin: EP2551602A1] The fume extractor hood (1) has a housing (2) and flat filter elements (3,4,5) detachably arranged on the housing by a magnet. A portion of the filter element for removing or releasing the filter element of the housing is rotated in the direction of an inner space (9) of the housing about a tilting axis. The entire filter element is rotated in the direction of inner space of the housing. The filter element is removable towards an upstream side (7). An independent claim is included for a filter element for a fume extractor hood.
