Abstract (en)

[origin: WO2011117738A2] A coated solid flavor particle comprises: a base particle comprising a solid flavor particle; a first polymeric coating material at least partially coating the base particle, said first coating material being selected from the group consisting of proteins, cationic polysaccharides or oligosaccharides, non-ionic polysaccharides or oligosaccharides, and mixtures of them; and a second polymeric coating material at least partially coating the first coating, said second coating material being selected from polysaccharides, proteins, a mixture of polysaccharides, a mixture of proteins, or a mixture of polysaccharides and proteins.
