Abstract (en)

[origin: WO2011121564A1] The invention relates to a device (1) for steaming an item to be cooked, in particular food, which is contained in a closed receiving area (18, 31) of a packaging unit (20), comprising a cooking chamber (2) which can be closed, wherein the packaging unit (20) can be introduced into the cooking chamber (2) and heated, and wherein the device (1) comprises a perforating device (10) for perforating at least some areas of an outer wrapping (17) of the receiving area (18, 31) of a packaging unit (20) located in the cooking chamber (2). The invention further comprises a packaging unit (20) for such a device (1) as well as a system comprising such a device (1) and such a packaging unit (20).
