Abstract (en)

[origin: WO2011120740A1] The present invention relates to a holding body, in particular a grinding plate (10), comprising a fastening layer (1) with a fastening surface (11) for fastening a flexible grinding means (9). The fastening layer (1) consists of an air- and dust-permeable material and is substantially full-surface. The fastening layer (1) can contain or consist of a textile material. The holding body can also comprise a supporting body (4) with a supporting surface (14) which supports a holding surface (15) of the fastening layer (1). The supporting body (4) can be air- and dust-permeable and can contain or consist of an open-cell foam. The invention also relates to a grinding system comprising a holding body and a flexible grinding means (9).
