Abstract (en)
[origin: WO2011117818A1] The invention relates to a mounting arrangement for mounting a workpiece (12) in a machine tool. The mounting arrangement (1) has a first head (2a) and second head (2b), which are designed to be fixed in position in a machine tool. A first jaw holder (6a, 6b) and a second jaw holder (8a, 8b) are provided on each of the heads (2a, 2b), wherein said holders can be moved individually with respect to each other. The first head (2a) and the second head (2b) are designed in such a manner that during use the first jaw holder (6a) of the first head is arranged opposite the first jaw holder (6b) of the second head (2b) and the second jaw holder (8b) of the first head (2a) is arranged opposite the second jaw holder (8a) of the second head (2b).
