Abstract (en)
[origin: WO2011121222A1] The invention relates to an automatic facility for decorating items (10) made of rough or refined glass or of plastic with raised patterns, said facility including a carrier (11) for continuously moving the items (10) between: a station (14) for loading the items (10) onto said carrier (11); a station (15) for screen-printing a decoration onto each item (10) by means of a UV ink; a station (16) for the ultraviolet pre-polymerization of the ink of the decoration, said ink remaining slightly adhesive on the surface; a station (17) for applying a paper film using heat by adhering same onto the ink of said decoration; and a station (18) for unloading the items (10) toward a tunnel for the final ultraviolet polymerization of said decoration.
