Abstract (en)

[origin: CA2795449A1] The invention relates to a moulding (1) for accommodating and fixing rectangular-outline storage containers (2), wherein an accommodating surface (3) of the moulding (1) covers an even-numbered multiple of the area covered by the container surface, and in each case two containers (2) are arranged adjacent to one another such that their facing side walls are located symmetrically in relation to the short centre longitudinal axis of the moulding (1), characterized in that the underside of the moulding, the underside being directed away from the accommodating surface (3), is provided, along the course of the centre longitudinal axis, with an encompassing groove (7) which brings together the facing side walls of in each case two adjacent storage containers arranged beneath the moulding and of which the side peripheries extend into the respective container (2).
