Abstract (en)  
[origin: WO2011121178A1] The invention relates to a pallet for storage or transport of articles or materials. The pallet comprises a base member (1) having a first surface (2) for supporting articles or material, a second surface (3), and at least one lateral side (4). The first surface (2) of the base member (1) is provided with first apertures (5) for receiving a first part (6) of a first wall member (7) of a first type, which first wall member (7) of a first type is to be supported in an essentially upright position at the base member and by the base member. The first surface (2) of the base member (1) is provided with second apertures (8) for receiving a second part (9) of a second wall member (10) of a second type, wherein said second type is different from said first type and wherein said second wall member (10) of the second type is to be supported in an essentially upright position at the base member and by the base member.
