Abstract (en)

[origin: WO2011126707A2] This invention provides an adhesive for roll-shaped paper which has a high initial adhesiveness and causes the paper to peel easily without making the application surface sticky, and a roll-shaped paper on which this adhesive for roll-shaped paper is applied. An adhesive for roll-shaped paper, comprising a saccharide (A), a viscosity modifier (B), and a glycol and/or triol (C), is provided. The adhesive has excellent initial adhesiveness as well as excellent peeling ability, and does not produce stickiness. The adhesive for roll-shaped paper of this invention is applied at the start of the winding of the roll-shaped paper and it can be used in an especially useful manner as a pick-up agent.
