Abstract (en)

[origin: WO2011121621A1] The present invention relates to a shock-absorber for sliding devices, such as sliding doors or windows, panels, gates, drawers, comprising a support body suitable for attaching near an end stop position of the sliding device and, borne by said support body, at least one decelerating device suitable for slowing down the travel of the sliding device near the end stop position and at least one magnet suitable for attracting a corresponding magnetic or ferromagnetic element borne by the sliding device to at least block the sliding device in the end stop position.
