Abstract (en)
[origin: WO2011123036A1] The present invention regards a dampener to augment the mounting of a lamp (10, 10a, 10b) in a socket (80, 82) by resisting displacement of the lamp (10, 10a, 10b) relative to the socket (80, 82), the dampener (40, 50, 60, 70, 90, 100, 200) is made from a material able to absorb vibrations and to reduce or prevent vibrations in the lamp (10, 10a, 10b). The dampener (40, 50, 60, 70, 90, 100, 200) is made in one piece or more pieces, wherein each piece is interposable in whole or in part between the socket (80, 82) and the lamp (10, 10a, 10b) base to insulate the lamp (10, 10a, 10b) in whole or part against the vibration translated through the socket (80, 82) or surrounding air.
