Abstract (en)  
The towel (10) has a two-layered structure with a first layer (13) made from moisture-collecting material i.e. terry toweling, and a second layer made from fluid-impermeable material e.g. plastic or foil material. The layers are connected with one another such that the layers are glued between circulating edges of the towel. A third layer made from fluid-collecting material i.e. non-woven fabric, is positioned between the first and second layers. An elastic fastening loop (17) is fastened to a narrow side of the towel and provided for fastening the towel to a headrest of a vehicle seat.
