Abstract (en)
[origin: EP2554291A1] A computer-controlled cutting machine (2) is arranged for cutting the workpieces (I,II,III,IV) from a sheet metal blank, and a computer-controlled handling device (5) is connected to the cutting machine. The cutting machine is computer-controlled based on machine-related control data, and the handling device is computer-controlled using device-related control data. The device-related control data is generated based on relevant machine-related control data. The device-related control data refers to the location, geometry, and/or the weight of workpieces. An independent claim is included for a mechanical arrangement for implementing workpiece processing method.
