Abstract (en)
[origin: EP2554339A1] Second hair lifting frames 33c provided on the rear side in the traveling direction have a hair lifting ability higher than first hair lifting frames 33c provided on the front side in the traveling direction. Accordingly, the differences in hair lifting ability between the first hair lifting frames 33c and the second hair lifting frames 33c can be reduced, so as to lift body hair up more efficiently.
