Abstract (en)

[origin: EP2554770A2] The device has a locking bolt (13) actuated by an eccentric cam lever (14), which is firmly connected with a lockable actuating rod (7). A control block (17) is fixedly connected with a guide surface for restricted guidance of the locking bolt. An assembly consisting of the control block and the guide surface is attached to door leaves (1, 2). A guide bush (8) is attached to the door leaves. The lockable actuating rod is guided into the guide bush. The locking bolt is movably connected with the eccentric cam lever.
