Abstract (en)

[origin: EP2554915A2] The filter support (22) has input surface for the introduction of air into the filter support. The filter support has filter holder (220) for filter element (21), which is arranged in a state inclined towards the input surface. The angle between the inlet openings of the two filter holders is less than 90 [deg]. An independent claim is included for fume extractor hood.
