Abstract (en)
[origin: WO2011124535A2] The invention relates to a cleaning device having a housing comprising a storage surface for placing a container, and having rolling wheels for displacing the cleaning device. In order to refine the cleaning device such that a container can be affixed to the storage surface in a simple manner, according to the invention, the cleaning device comprises at least one storage space in which at least one clamping element is disposed in a stored position and can be at least partially removed from the storage space and can be transferred into a working position in order to affix the container to the storage surface.
