Abstract (en)
[origin: WO2011124373A1] The invention relates to a fire-protection or smoke-protection cover for an opening (38), comprising a fire-protection textile material (12), a guiding element (14), a storage device (18) which is used to store the fire-protection textile material (12), and is guided on the guiding element (14), and (d) at least one closing device (30) respectively comprising a closing element (34.4) on the textile material side, arranged on an edge of the fire-protection textile material (12), and a closing element (32.4) on the guiding element side, fixed to the guiding element (14). The closing element (34.4) on the textile material side and the closing element (32.4) on the guiding element side are designed in such a way as to be connected in a form-fitting manner, and a locking device (40.4) is used to hold together the closing element (34.4) on the textile material side and the closing element (32.4) on the guiding element side.
