Abstract (en)
[origin: CA2797755A1] The invention relates to a fire-protection or smoke-protection device for an opening (12) in a part (14) of a building, especially a door surround, comprising a flexible, flat fire-protection element (16) that can be guided into a storage arrangement wherein the fire-protection element (16) is folded at folding points (18), and into a sealing arrangement wherein the fire protection element (16) is unfolded and closes the opening (12). The fire-protection element (16) comprises a groove (32) at least on one side, by which means the building part (14) can be at least partially gripped in order to guide the fire protection element (16).
