Abstract (en)
[origin: WO2011136643A1] The invention relates to a packaging, particularly for foodstuffs, comprising - a top layer (120) and a bottom layer (121), which layers are connected to each other gastightly over their overlapping edge zones while leaving clear an opening between an end zone of the top layer and a part of the bottom layer; and - a closing flap (115) which extends from the bottom layer and is connected gastightly thereto; wherein - the packaging comprises a reclosing strip (107) connected to the top layer close to its end zone such that the closing flap (107) extends over the reclosing strip when it is in a position for reclosing the packaging; the reclosing strip is connected to the side of the top layer facing toward the bottom layer; the top layer is a laminate. The invention further relates to a method and a device for manufacturing such a packaging.
