Abstract (en)
  [origin: WO2011127133A2] A container assembly has: a container body having a mouth; and a container closure member having a mounting portion mounted to the body. The closure member mounting portion has a lower portion (182) having an inward barb projection (220) which engages an underside of a hollow annular flange (250) of the body. A closure member mounting portion includes an additional annular projection (224) above the barb projection and engaging an underside of an outwardly projecting portion of the container body.
