Abstract (en)
[origin: WO2011125016A1] A machine (10) for applying a closing element (T) to a container (C), the closing element (T) being, more specifically, in the form of a dispensing pump element with a tube, or siphon, inserted into the container (C). The machine comprises supporting means (11) for means (12) that associate the closing element (T) with the container (C) and means (50, 51) for guiding the closing elements along their respective path and which are in the form of replaceable means.
