Abstract (en)

[origin: WO2011126452A1] The present invention relates to an agent for the removal of paint, varnish, glue, rubber, plastic, soot and coke or the like on objects. The agent contains: a) aromatic alcohol having the property of being partially soluble in water, b) water c) tenside, and d) acid. According to the invention, the tenside consists of anionic, alternatively zwitterionic ones of the type alkylbenzene sulphonate, alkylsulphonate or alkylamine dipropionate. The acid that is used as an activator (co-solvent) of the liquid cleaning agent in question is a weaker organic acid such as carboxylic acids such as hexane acid and heptane acid, divalent aliphatic carboxylic acids such as malonic acid and succinic acid, dihydroxydicarboxylic acid such as tartaric acid, aromatic carboxylic acids such as benzoic acid, a-hydroxy acids such as glycolic acid and/or lactic acid, or a mixture thereof. The invention also relates to a use of the agent for the removal of paint, etc., from objects.
