Abstract (en)
[origin: EP2557053A1] The container has a pallet formed of a plate (2), and crosspieces (5) fixed under the plate. One of the crosspieces has an outer side edge along an edge of the pallet, and a belt surrounds the plate. The belt has a panel (31) adjacent to the side edge. The panel of the belt has a flap (33) with a tenon (34), pivoting around a horizontal folding line parallel to the plate. The side edge has a flap (53) with mortise, pivoting around a horizontal folding line. The tenon is inserted in the mortise, and the tenon and the mortise form a retaining unit to retain the belt into the pallet.
