Abstract (en)
[origin: EP2557364A2] The apparatus has a console (10) which is provided as a continuous or non-continuous rail (20). A latching element (30) has a mounting state (30.1), on which a radiator is mounted, and is brought into an installation position. The latching element has a disassembly state, in which the radiator is removed from an installed position. A spring is provided to bring the latching element into the mounting state. A stop is provided on the latching element, which acts together with a counter-stop on the console.
