Abstract (en)
[origin: WO2011127500A1] The invention relates to a device for producing cigarettes, in particular for producing individual cigarettes or cigarettes in small quantities, comprising at least one accommodating shaft (1) for accommodating loose tobacco, at least one pressing apparatus (2) arranged behind the accommodating shaft (1) in a tobacco transport direction for pressing the loose tobacco to form a tobacco strand, and at least one advancing apparatus (3) arranged behind the pressing apparatus (2) in the tobacco transport direction for pushing the tobacco strand into a sleeve-shaped cigarette paper (4), wherein the device has at least one conveying apparatus (5) arranged in front of the pressing apparatus (2) in the tobacco transport direction for transporting the loose tobacco and at least one cutting blade (6), which is arranged in front of the pressing apparatus (2) in the tobacco transport direction and preferably rotatably supported, for cutting the loose tobacco exiting the conveying apparatus (5).
