Abstract (en)
[origin: WO2011128851A2] Button for articles of clothing comprising a first part intended to be attached on a fabric portion of the article of clothing by seams or the like, a second part having an essentially aesthetic effect connectable to the first part such to overlap said first part for covering it, particularly for covering the underlying seams, wherein said first part has a substantially flat shape and has areas for the seams to pass through, said second part has a bottom wall and a perimetral spacer rim such to substantially form a container, typical a cylindrical one, of which the first part is the closure when in the coupled condition, there being provided means for removably fastening said first part on said second part in a closed overlapping position.
