Abstract (en)

[origin: WO2011131213A1] The invention relates to a carrying handle arrangement for detachably attaching to a container arrangement (1), which has at least one accommodating shaft (9, 10, 11) for accommodating an information carrying card designed in the form of a check card. According to the invention, the carrying handle arrangement has a carrying handle (21) and a coupling device (13) attached to the carrying handle (21). In some areas, the coupling device has a check-card-shaped section (33) that corresponds to the shape of the accommodating shaft (9, 10, 11), said section being designed to fasten the coupling device (13) in the accommodating shaft (9, 10, 11) of the container arrangement (1).
