Abstract (en)

[origin: WO2012079986A1] The hooking device (1) for connecting drawer (3) to a longitudinal guide (3) comprises a support body (4) fixable to a front (5) and/or a bottom (6) of the drawer (2) and provided with an oscillating command lever (12) for a hooking organ (13) of the support body (4) to the guide (3), the hooking organ (13) being mobile between a hooking position and an unhooking position, the lever (12) exhibiting a first surface zone (16) and respectively a second surface zone (17) for manual gripping configured in such a way as to be selectively subjectable to a first manual activating force (F1) or respectively to a second manual activating force (F2) in reciprocally transversal directions and destined to generate an oscillation torque of the said command lever (12) in a same direction in order to bring the hooking organ (13) into the unhooking position.
