Abstract (en)

[origin: WO2011130400A1] The present invention relates to a method of providing enhanced resveratrol activity comprising: administering a therapeutically effective amount of 4-acetoxy-resveratrol for the treatment of and preventing physiological and pathophysiological conditions mediated by (1) sirtuins, (2) estrogen and anti-estrogen hormone actions and (3) chemical interventions important for male and female health, aging, anti-aging and age-related disorders.
