Abstract (en)
[origin: WO2011124305A1] The invention relates to a door for motor vehicle, comprising a door support (10) with at least one metal carrier element (12) which is at least partially provided with plastic (18), wherein the at least one metal carrier element (12) is designed as an inner high-pressure deforming part. The invention further relates to a method for producing such a door.
