Abstract (en)

[origin: WO2011128511A1] The invention relates to a boom, personnel hoist, and method for using a personnel hoist. The boom (3) comprises a first boom part (3a) and a second boom part (3b) connected to each other by a connecting member(8). The boom parts are arranged side by side in the transport position. The upper boom part may be turned into a turning position for use, whereby its axis is on the same vertical plane (T) as the lower boom part. The connecting member comprises a turning axis (K) parallel to the lower boom part.
