Abstract (en)

[origin: WO2011141208A1] The invention relates to a washing machine (1) comprising a suds container (2), a dispensing tray (11), and a gas removing device (20). An exhaust air channel (17) is connected to the dispensing tray (11) via a first exhaust air sub-channel (18) and/or to the suds container (2) via a second exhaust air sub-channel (19), and the gas removing device (20) and a suction pump (21) are located in the exhaust air channel (17). The invention further relates to a method for operating said washing machine.
