Abstract (en)

[origin: WO2011128114A2] The invention relates to a method for operating a floor planer, which has at least one vertically adjustable planing roller (10), it being provided that the planing roller (10) performs an automatically controlled and/or regulated tumbling movement (T') as it is being lowered (A) during operation. The invention also relates to a control device for regulating and/or controlling this process, and also to a floor planer having such a control device.
