Abstract (en)

[origin: WO2011127495A1] The invention relates to a device for fastening a fitting (1), in particular a water outlet fitting, to a tap hole (2) of a plate, a basin (3), or the like, said device comprising a clamping element (4), which can be threaded with the fitting (1), the edge (5) of the tap hole thereby being clamped. In order to create advantageous installation conditions, a threaded projection (6) of the clamping element (4) threads into a threaded nut (8) associated with the fitting housing (7) and freely rotatably supported on said fitting housing.
