Abstract (en)

[origin: WO2011128602A1] The invention relates to a base (1) for a snow stake which includes a rod (10) and a means for connecting the rod to the body of a hinged or rigid stake. The base additionally includes a shell (30) added securely about the rod and made of a resilient material. The hardness of the material from which the rod is made is greater than the hardness of the material from which the shell is made. The shell comprises a plurality of projecting ribs (31) on the periphery of the shell.
