Abstract (en)

[origin: US2013097581A1] The invention relates to a process for recording a plurality of data items constituting at least one entity. According to the invention, such a process includes: a phase of creating a data definition for each data item of said plurality of data items; a phase of creating a relation definition for at least one relation between at least two previously created data definitions; a phase of creating each data item and relation of said plurality of data items; a phase of recording each data item of said plurality of data items so that a recorded data item is associated with a corresponding data definition; a phase of recording at least one relation so that a recorded relation corresponds to a relation definition and is associated with at least one previously recorded data item.
