Abstract (en)

[origin: EP2559412A1] The equipment (1) has a foot frame (3) provided with rollers (4), and a lifting column (5) attached to the foot frame. A stroke part (7) of the lifting column is linearly and vertically moved up and down with a standing platform (8) and an adjustable annular handle (11). The handle is adjustable in a lifting function such that distance between the standing platform and the handle amounts to 1 m, and a person (2) standing on the standing platform is securely and partially surrounded by the handle. The handle serves as an ergonomic support for a user in a rolling function.
