Abstract (en)

Device (1) for remolding a fresh, slipform cast concrete product, said device comprising a stationary digging jaw (4) fixedly attached to a support structure (2), and a movable digging jaw (3) that is movable with respect to the stationary digging jaw; and means (5) for operating the movable digging jaw, wherein the movable digging jaw (3) being attached to the support structure (2) by intermediation of two or several articulated joints or shafts (6, 7) for shifting the tip of the movable digging jaw towards the stationary digging jaw (4) substantially on the horizontal level. The invention also relates to equipment provided with such a device.
