Abstract (en)
[origin: EP2559617A2] The rudder device (10) has a spade rudder which is supported by the outer wall of the watercraft. A rudder shaft (8) formed from a composite fiber is mounted in a sliding bearing (16) within the watercraft. A rudder lever (46) is more swingable about a longitudinal axis of the rudder shaft. A fixing component (18) for rudder lever is arranged at the end of rudder shaft within the watercraft, to form portion of the sliding bearing.
