Abstract (en)

[origin: EP2559837A2] The profile (4) has a base surface provided with grooves for fastening screws (9a). A tubular or open part has a plastering edge (4x) arranged transverse to thickness of a plaster layer (2) to be applied and comprising a 45 degrees chamfer to the plaster layer. A groove or protruding rib is provided in a region adjacent to the plastering edge and plaster layer and for mounting by clipping, insertion or gluing of a reinforcement mesh (2a). The mesh has a profile at its longitudinal edge (2b) so that the mesh lies in a position within the plaster layer and at the plastering edge.
