Abstract (en)  
[origin: EP2559954A2] The housing (8) has a rear side (2) which comprises units for fastening at a wall (3). Two rollers (5) are attached at a rotational axis at the lower edge of the rear side. The rotational axis of the roller has a smaller distance to lower side (7) of the housing than the radius of the rollers. The rotational axis of the roller has a smaller distance to rear side of the housing than the radius of the roller. The two rollers have common rotational axis. A handle is arranged at the upper side (9) of the housing.
