Abstract (en)  
The invention relates to a method for operating a domestic appliance, wherein the domestic appliance has at least one switching and/or adjusting element for switching and/or adjusting especially a main parameter of the domestic appliance when the domestic appliance is in a switched-on mode, the domestic appliance has a display element by which a value especially of a main parameter of the domestic appliance can be displayed when the domestic appliance is in a switched-on mode and an alarm clock function can be activated in an alarm clock operation mode in which a time or a time interval can be set till triggering an alarm, wherein the alarm clock operation mode is started immediately after pressing and/or activating of the at least one switching and/or adjusting element when the domestic appliance is in a switched-off mode, and wherein the display of the display element changes from a display of the actual time to the alarm time and/or to the remaining time interval till triggering the alarm by pressing and/or activating of the at least one switching and/or adjusting element (2).
